## KNOWLEDGE MANAGEMENT CULTURE

**Anahit Gasparyan** 

Anahit.Gasparyan@cba.am

# Learning Organization Definition

"A learning organization is an organization skilled at creating, acquiring, interpreting, transferring, and retaining knowledge, and at purposefully modifying its behavior to reflect new knowledge and insights"

## KNOWLEDGE SHARING PROGRAMS

#### **DISCOVER**

- Knowledge sources and recourses should be mapped.
- Critical roles and knowledge holders should be identified.

#### **CAPTURE**

- With different methods explicit and tacit knowledge should be collected.
- Sharing sessions spontaneous and voluntary sharing of knowledge.

#### **VALIDATE**

Validation

 approaches
 need to be

 used: validation committee, self-review, peer review.

#### **FORMAT**

 Responsible manager/unit should work on knowledge content and format it.

#### **DISSEMINATE**

Many channels should be used:

- learning initiatives (workshops, conferences),
- online courses, webinars, blended learning events,

#### **MAINTAIN**

Knowledge ahould be applied in daily work and also maintained over time to make sure it remains relevant and up-to-date.

### LEARNING FROM EXPERTS

A TOOLBOX FOR IDENTIFYING THE EXPERTS

- ➤ What challenges do your peers frequently seek your expertise for, which seem difficult to others?
- ➤ In terms of systems, processes, or technologies, in which areas do you possess unparalleled knowledge?
- From your perspective, what issues are most likely to arise or become complex to resolve in your absence?
- What personal habits or practices have you found to be crucial for staying ahead in your position
- ➤ Could you share an example of a mistake you made in your field and the lessons you learned from it that might not be commonly known?
- ➢ How do you maintain your expertise and continue to learn in your rapidly evolving industry?
- What personal habits or practices have you found to be crucial for staying ahead in our industry?
- ➤ Can you describe a situation where you had to innovate or develop a novel solution to overcome an unforeseen challenge? How did you approach it?

## Why KM is needed in organizations

Our knowledge stays within our heads, not captured and shared across the organization

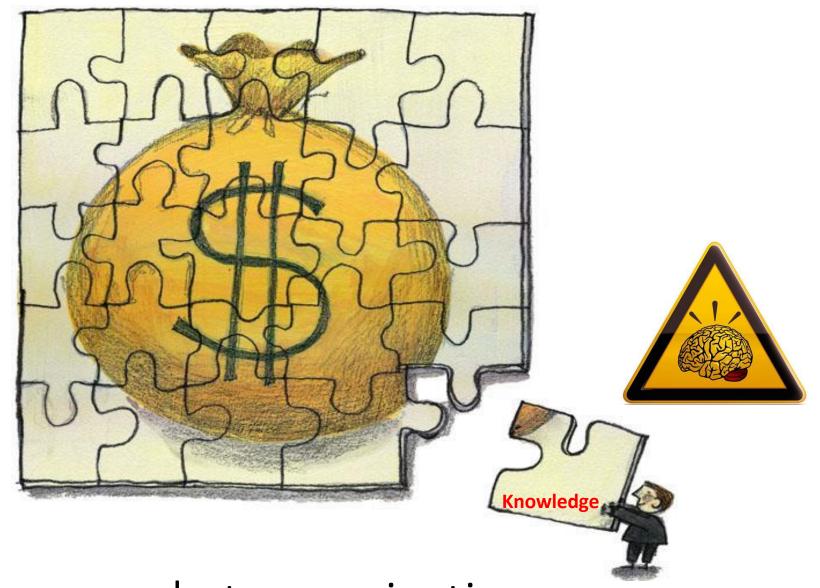

When key staff members leave, we risk losing important know-how We are not documenting and replicating successful solutions – or learning from failures

Increase effectiveness of service delivery

2 Increase sustainability of service delivery

Replication and scale-up of what works

### Knowledge is a critical asset

It should be managed at organizations
